

ELECTRIC VEHICLE CHARGING SOLUTIONS

IMPROVE EFFICIENCY AND FUTURE-
PROOF YOUR BUSINESS

67% OF UK OFFICE WORKERS ARE PLANNING ON BUYING AN ELECTRIC VEHICLE.

OLEV Registered Installers

We can select the right charging solution to suit your premises and vehicle charging requirements. As an OLEV registered installer we can also assist businesses with the government's Workplace Charging Scheme (WCS). This is a voucher-based scheme that provides support towards the up-front costs of the purchase and installation of the EV charging points, for eligible businesses, charities and the public sector organisations.

Future-proof your Business

In 2030 there will be a ban on the sale of new petrol and diesel cars, it is expected by this point that seven out of ten cars will be electric. Those looking to gain a competitive advantage and stay ahead of the crowd will need to be equipped to cope with the significant expansion of the EV market. If you choose to install your electric car charging points sooner rather than later, you'll be future-proofing your business, ready for when the change happens.

Essential Business Facilities

As the transition is made toward electric vehicles, businesses will be expected to provide facilities for not only for their own fleet but also for their clients and employees. This will make your business more attractive to potential talent and clients who may be based quite some distance away and are in need to charge their car on-site when reaching your premises.

Reduce your Carbon Footprint

By using an electric vehicle fleet, you can take control of your environmental impact and your costs. Electric Vehicles emit less greenhouse gases and air pollutants over their entire life cycle than petrol and diesel car, helping to reduce your carbon footprint.

Remark Group are passionate about helping businesses make the switch to greener driving. We can help you meet environmental targets and find the most effective Electric Vehicle (EV) solution for your business. We offer everything from a single point installation for smaller sites to multi-site depots for larger organisations.

Every businesses' charging needs are unique, that's why we design every project with your requirements in mind. Remark specialises in designing and installing EV Charging solutions that meet the needs of our clients.

WE OFFER EV CHARGING SOLUTIONS FROM SINGLE POINT INSTALLATION FOR SMES, TO MULTI-SITE DEPOTS FOR LARGER ORGANISATIONS. WHETHER YOU ARE HELPING YOUR EMPLOYEES MAKE THE SWITCH TO ELECTRICAL VEHICLES OR REQUIRE CHARGING POINTS FOR RETAIL, RESIDENTIAL AND COMMERCIAL DEVELOPMENTS, OUR TEAMS CAN PROVIDE THE MOST SUITABLE CHARGING SOLUTION FOR YOU.
