

Cabinet Rationalisation Services

MAXIMISE THE EFFICIENCY OF YOUR
NETWORK INFRASTRUCTURE

CABINET RATIONALISATION (KNOWN AS A CABINET TIDY), IS A SERVICE OFFERED BY REMARK GROUP THAT DISASSEMBLES AND THEN RE-BUILDS THE CABINET TO A SHOWROOM CONDITION.

Improve Fault Finding

Troubleshooting in an untidy network cabinet is challenging for everyone, including engineers. It is important for cables to be organised to make fault finding quick and easy. Colour coding and correctly labelled patch panels creates a quick identification.

Enhance Safety

Tangled and unorganised cables are more likely to lead to increased heat, and may even cause a fire. Someone could trip over the cables leading to a workplace injury, or they may damage the devices that are connected to the unorganised cables. Once a cabinet is organised, this will also allow for more room for extra hardware and cabling.

Increase Air Flow

Keeping temperatures low and consistent is beneficial to equipment and performance. Increased temperatures not only damage electronic equipment, but it can also damage the cable jacket and its inner workings. Untidy network cabinets reduces the airflow, degrading performance and ultimately damaging both cables and hardware. Greater airflow around the cabinet, and infrastructure, reduces the risk of any potential network failures.

Over time, network cabinets can become untidy and disorganised, which can make fault finding and emergency works longer than usual. Businesses rely on their communications equipment to run their operation, and often lose valuable time dealing with faulty wiring and cabling. So, we replace all patch cables with the correct size and colour schemes are introduced, to help with business efficiency.

Remark Group's Cabinet Rationalisation service will re-organise untidy cabinets, strip out old systems, and then re-patch current systems, to ensure your core communication services are able to underpin your business. Every business is unique and has different requirements. Remark Group take pride in every cabinet rationalisation solution, so you can be assured that your project will be bespoke to your exact requirements.

AS BUSINESSES GROW AND EXPAND, THEIR NETWORK INFRASTRUCTURE HAS TO BE FLEXIBLE. OUR NETWORK CABINET RATIONALISATION SERVICE, CAN BRING MANAGEMENT AND ORDER FROM CHAOS, AND RETURN DATA CABINETS TO THEIR FORMER GLORY.
