

Audio Visual Technologies

Experts in audio visual and video conferencing, we specialise in providing intelligent working solutions that fit your requirements and your budget. With a team of highly qualified and experienced AV installation and maintenance engineers, we can fulfill even the most complex of projects, from conception through to installation and ongoing maintenance.

Remark Group offer complete audio visual solutions for meeting rooms and open plan offices. Remark are always at the forefront of Business Technology offering new innovations and technological advances from video conferencing solutions through to digital signage. We can provide you with the most up to date solutions all with the ability to integrate with your office infrastructure.

Innovation and user-friendly technology solutions are now improving the way we work and learn. Communication technologies continue to move on at an incredible pace – and more and more creative solutions are being developed to keep staff customers, stakeholders and suppliers informed. Advances in technology make almost anything possible within the sphere of audio visual solutions, allowing your business to collaborate with your target stakeholders creatively, efficiently and cost-effectively.

Video Conferencing

Remark Group can supply and install the right video conferencing equipment and solution for your business. Our extensive experience across the industry allows us to offer expert advice to ensure that you receive the best solution for your business's needs.

We are certified partners for multiple companies across the UK, meaning we can offer market leading products and solutions. By implementing state-of-the-art video conferencing solutions, we can ensure that you have a technological advantage that will drive your business forward. We can provide on-site training to ensure that your employees make the most of their bespoke video conferencing solution.

Digital Signage

LCD, LED and projection technology enables you to display content anywhere around the world, and with the ability to display digital images, video, streaming media, web-pages and text, you can effectively deliver your brand messages in a very targeted and effective way.

Increase productivity, improve employee retention and enhance creativity with digital signage. Using digital communications toward better employee engagement helps create a more cohesive workforce.

Wireless Presentation

We all know the challenges of arranging meetings when people are in multiple locations, operating individual work diaries and so on. For that reason, there has been significant growth in wireless presentation technology. With wireless presentation and collaboration systems, multiple people can engage in a meeting, conference or training session. It makes sharing and presenting in meetings seamless, irrespective of location.

Adopting wireless presentation will pay dividends for your business by improving time management and reducing training and mileage costs. It is all designed to ensure increased efficiency and reduced operating costs.

Interactive Displays

Collaboration is essential in today's working environment. Successful businesses are the ones who get their people together to pool their ideas and share their knowledge, and interactive technology is becoming key to achieving this. Forward-looking companies are kitting out huddle spaces and meeting rooms with the latest interactive panels and content-sharing applications to facilitate and encourage co-operative working and the visual sharing of ideas.

Whether you are looking for interactive technology for retail, healthcare or corporate services, Remark Group can work with you to find the right solution for your business.
